

Utah County Stormwater Coalition would like to invite you to attend a training seminar that will share information to facility owners/operators on the required state of Utah rules and regulations, *Utah Administrative Code (UAC) R317-8-3.9*, for permit coverage under the NPDES Multi Sector General permit for Storm Water Discharges for your Industrial Activities.

Specifically, any facility that is not eligible for a *No Exposure* certification is required to obtain permit coverage under the specific sector/sub-sector/sic code for your specific activities. This permit requires training and the development and implementation of a storm water pollution prevention plan for your facility. Failure to comply with the NPDES MSGP requirements could result in penalties of up to \$10,000 per day in the state of Utah.

These topics will be discussed and reviewed at our *FREE* training - being provided to you by Utah County Stormwater Coalition. You may attend either day but an emphasis as indicated below will be presented.

Training Date/Time: Tuesday, May 19, 2009 at 10:00am

For Motor Freight Transportation Facilities, Passenger Transportation Facilities, Petroleum bulk Oil Station and Terminals

Tuesday, May 26, 2009 at 10:00am

Automobile Salvage yard, Scrap Recycling and Waste Recycling Facilities
